Self-Introductions

EcoGreen Group of Silicon Valley

Creating Opportunities for Sustainability and Clean Technologies

Mission

EcoGreen Group creates professional and entrepreneurial opportunities in sustainability and clean technologies through education, professional development, industry collaboration, and networking.

The EcoGreen Group fulfills this mission through our

- online blog,
- social media,
- collaborative workspaces,
- volunteer opportunities,
- member projects,
- weekly and monthly meetings,
- and speaker events on specific sustainability topics.

Creating Opportunities for Sustainability and Clean Technologies

Upcoming EGG Programs

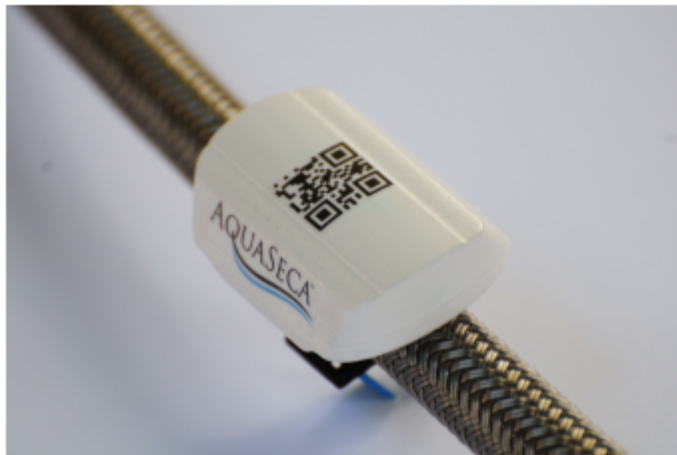

Jan 21 “Options for de-carbonizing our energy systems”

Stanford Energy Seminar recorded 11/16/2015

Virtual speaker: Professor Arun Majumdar

Jan 28 Speaker: Nancy Hartsoch, CEO, Aquaseca

Protect your building, minimize water damage, maximize water efficiency.

Whole Building Leak Detection and Water Optimization

Aging plumbing, outdated distribution systems and equipment malfunctions cost commercial property owners billions of dollars in water damage and loss annually. The AquaSeca leak detection and water optimization system helps commercial property owners and managers achieve operational and financial goals for properties.

Water and Energy- Forever Intertwined

Tony Green works as a Water Treatment Sales Engineer for a sustainability focused water treatment company, helping clients reduce their water consumption and optimize their energy use in a sustainable manner. He enjoys using his technical background in helping people solve problems in applications that will make the world a better place. His career has included roles in application or project engineering and sales/marketing in alternative energy, environmental and utility industries.
