Self-Introductions

EcoGreen Group of Silicon Valley

Creating Opportunities for Sustainability and Clean Technologies

Mission

EcoGreen Group creates professional and entrepreneurial opportunities in sustainability and clean technologies through education, professional development, industry collaboration, and networking.

The EcoGreen Group fulfills this mission through our

- online blog,
- social media,
- collaborative workspaces,
- **volunteer opportunities** (see Rod)
- member projects,
- weekly and monthly meetings,
- and speaker events on specific sustainability topics.

Upcoming EGG Programs

Introduction To Tesla Inc. Powerwall

A Presentation By Mike Mueller - Tesla Inc.

EcoGreen Group of Silicon Valley
Creating Opportunities for Sustainability and Clean Technologies

May 11 program

The Powerwall is a Tesla Inc. product that provides Lithium battery energy storage for homes. Unused solar generated power can be stored for later use after the sun sets. It is also used for time of use load shifting, backup power, and as an off grid energy source. For our May 11, 2017 meeting, Mike Mueller from Tesla inc. will give us a close look at this product and go over details of its usage. Please join us at this informative meeting and join the discussion and learn more about this product.

Please sign up on Meetup !
