Creating Opportunities for Sustainability and Clean Technologies

## **Today's Agenda**

8:00 – 8:30    **Mission of EGG**  
**Upcoming programs & events**

8:30 – 9:45    **Greentech Income Generation Workshop**  
**Facilitated by Alex Mednick**

# EcoGreen Group of Silicon Valley

Creating Opportunities for Sustainability and Clean Technologies

## Mission

EcoGreen Group creates professional and entrepreneurial opportunities in sustainability and clean technologies through education, professional development, industry collaboration, and networking.

The EcoGreen Group fulfills this mission through our

- online blog,
- social media,
- collaborative workspaces,
- volunteer opportunities,
- member projects,
- weekly and monthly meetings,
- and speaker events on specific sustainability topics.

## Upcoming EGG Programs

- June 04 “Where Nanomaterials Meet Water”  
Presentation by Mei-Ling Shek
- June 09 Big Data Use Cases For Energy  
Dj Das – Milpitas Library
- June 11 Video, discussion, or surprise
- June 18 “Grey Water” Presentation by Tony Green
- June 25 Cleantech Income Opportunity Workshop  
Alex Mednick
- July 02 TBD – Possibly no meeting due to July 4<sup>th</sup>  
Holiday
- July 09 TBD

## Other Events

### Six Free Sustainability Webinars: Lunch and Learn Sessions by Leonardo Academy June 2 – July 7, 2015

MADISON, WI, May 21, 2015 /3BL Media/ – Leonardo Academy announced that it will provide a series of six free sustainability webinars, one per week from June 2 to July 7, 2015. The training sessions will be presented by Leonardo Academy staff members. Leonardo Academy is providing this free training to empower individuals, organizations and companies to advance sustainability. Register by sending an email with your name and email address to:

Creating Opportunities for Sustainability and Clean Technologies

- Lighting for Human Factors and Energy Efficiency Webinar
- PG&E Online Class
- 6/03/2015 1PM – 4PM
- Info at <http://bit.ly/1d0HQbT>
- Learn about research findings in new lighting technologies for human factors and energy efficiency. Discover existing lighting applications with dual focus on human health and energy efficiency. Learn how to design and what the system components are for these new applications. Learn to use simple rules and common sense principles to apply energy efficiency and human factors.

# EcoGreen Group of Silicon Valley

Creating Opportunities for Sustainability and Clean Technologies

- Daylight Deconstructed: A Visual Understanding of Sustainability Metrics and How to Apply Them
- PG&E Class in San Francisco
- 6/25/2015 6:30PM – 10PM
- Info at <http://bit.ly/1d0lqGC>
- Participating in this seminar will inform you about pursuing the LEED daylight credits and how to use new technology to drive daylight beyond LEED. You will learn several principles and concepts of daylight analysis including basic solar geometry, sky conditions, annual climate data, sampling, material properties, glare, and shade controls. Dr. Glazer will use an iterative daylight design example to illustrate trade-offs of various strategies.

NATIONAL SCIENCE FOUNDATION  
4201 WILSON BOULEVARD  
ARLINGTON, VIRGINIA 22230

NSF 15-082

## **Dear Colleague Letter: Research on Theory and Analytical Tools for Power Networks with High Levels of Renewable Generation**

With this Dear Colleague letter (DCL), the Division of Electrical, Communications and Cyber Systems (ECCS) of the National Science Foundation (NSF) announces its interest in receiving EARly-Concept Grants for Exploratory Research (EAGER) proposals to support research efforts in developing fundamental theory and analytical methodologies for power networks with high penetration of renewables.

The purpose of this Dear Colleague Letter is to invite EAGER proposals for research to develop models and new theory for the emerging power grid with high levels of distributed generation from renewable sources.
