EcoGreen Group of Silicon Valley

Creating Opportunities for Sustainability and Clean Technologies

Mission

EcoGreen Group creates professional and entrepreneurial opportunities in sustainability and clean technologies through education, professional development, industry collaboration, and networking.

The EcoGreen Group fulfills this mission through our

- online blog,
- social media,
- collaborative workspaces,
- volunteer opportunities,
- member projects,
- weekly and monthly meetings,
- and speaker events on specific sustainability topics.

Upcoming EGG Programs

Sept	21	Open
Sept	28	Open
Oct	05	Open
Oct	12	Open
Oct	19	Open
Oct	26	Open

Creating Opportunities for Sustainability and Clean Technologies

NREL's SAM

- NREL's SAM2017.9.5 SAM Open Source Code available.
- Open Source Code (System Advisor Model)
- More info: <https://sam.nrel.gov/opensource>
- The DOE, NREL, and Sandia continue to use the model for program planning and in grant programs. Since the first public release, over 35,000 people representing manufacturers, project developers, academic researchers, and policy makers have downloaded the software. Manufacturers are using the model to evaluate the impact of efficiency improvements or cost reductions in their products on the cost of energy from installed systems. Project developers use SAM to evaluate different system configurations to maximize earnings from electricity sales. Policy makers and designers use the model to experiment with different incentive structures.

EcoGreen Group of Silicon Valley

Creating Opportunities for Sustainability and Clean Technologies
