Creating Opportunities for Sustainability and Clean Technologies

The Santa Clara Valley Water District is happy to announce the release of the Fiscal Year 2017 Safe, Clean Water funded Water Conservation Research Grant Program (Grant Program) Request for Proposal (RFP). The Grant Program is established to provide funding for research of new and innovative water conservation programs and technologies. The primary goal is to identify water savings devices and strategies that can assist the District in meeting its long-term water savings goal of 98,800 acre-feet per year by 2030.

For those that are interested, a non-mandatory pre-proposal workshop will be held on October 18, 2016, from 9 a.m. to 11 a.m. in the district's headquarters building in Conference Room A-143.

The RFP is also posted on the Safe, Clean Water website: <http://www.valleywater.org/SCW-A2.aspx>
